

Racks and Integrated Solutions

Starting with flexible, easily installed, adaptable, and pre-configured customized server racks and network cabinets will save costs, footprint, and will increase performance, efficiency, and reliability of your critical infrastructure. Vertiv offers a number of different containment solutions that will help you reach your objectives.

Vertiv Avocent IT Systems

The Vertiv™ Avocent® ecosystem is a series of IT management hardware and software that provides solutions in the data center, at the desktop, and at the edge. No matter your location, the Vertiv Avocent and Vertiv™ Cybex™ KVM switches and serial consoles provide easy, single-point access to valuable system data.

UPS

The critical systems that sustain your business operations can't go down. Vertiv supports you in improving your uptime with a full range of innovative Vertiv™ Liebert® uninterruptible power supplies (UPS) and future-proof, integrated UPS systems, that will cover the backup power needs of your IT infrastructure, from small computer rooms at the network edge to enterprise and hyperscale data centers. Discover the best uninterruptible supplies to protect your application.

Software

Today's data center cannot be managed in a siloed manner. You need a comprehensive monitoring software solution, that collects all the data you need to run your critical infrastructure efficiently, and delivers a real-time, integrated view of the entire IT facility and its subsequent assets. Discover how you can make the most out of our innovative monitoring software solutions to gain visibility and management of your data center from the core to the edge of your network.

Rack Cooling

Higher data transfer speeds, low latency, and constant availability require more computing power, which in turn means higher power densities per rack. For your unique performance requirements to be achieved, the servers in the rack must operate at peak capacity and within the optimum temperature. We're with you in reaching that goal, through future-proofed rack cooling solutions, that not only ensure optimum temperature, but optimum energy savings.

Rack Power Distribution

Increasing rack power density both in the data center and at the network edge means that reliable power distribution is crucial. Our innovative power distribution units and rack PDUs not only maintain power, but they also enable us to support you in any challenges your IT infrastructure might face. Vertiv offers basic, monitored, switched, and locking receptacle rack power distribution units.
